NodeJS   REST

PROJECTS

TrekTracker - Trail Finder Web Application
(07/2023 - 10/2023) 🔗

- Developed a dynamic biking and hiking trail application using React, NodeJS and TypeScript allowing registered users to discover, bookmark and annotate trails across all 50 states.
- Integrated Google Authentication, Firestore and Storage to manage user registration, trail data and image uploads.
- Efficiently merged data from TrailAPI, OpenWeatherMap, and Google Maps API, providing users with an interactive display of trails, real-time weather conditions, and a map pinpointing trail locations.

Meme Generator - React Web Application
(10/2023 - 11/2023) 🔗

- Implemented a user-friendly interface that seamlessly integrates with an image API to fetch and display a curated collection of the top 100 popular meme images, enhancing user engagement.
- Enabled users to personalize memes by adding their own text, offering a unique platform for creativity and humor.
- Integrated a flexible light and dark mode feature, catering to user preferences for a comfortable viewing experience. This addition demonstrates attention to modern web design trends and user-centric development.

CERTIFICATES
